Å. Vallbo, Umeå
G. Wallin, Göteborg
G. Westheimer, Berkeley

Language Editor:
M. Lawden, Oxford, UK

Springer International

Human Neurobiology is primarily devoted to studies of the biological basis of mental activity and of human behavior. Though the major emphasis is on the species of man, it also publishes investigations on other primates related to human neurobiology.
Human Neurobiology attempts to cover and to integrate neuropsychology, sensory physiology, neuroendocrinology, neurology, neurosurgery, neurophysiology, neuropsychiatry, neurolinguistics, neuroethology, developmental neurobiology, neurochemistry, neuropharmacology, neuroanatomy, and neuropathology, thus forming a bridge between basic and applied science within the fields mentioned.
Human Neurobiology publishes issues containing independent original articles as well as reviews, also some issues devoted to special topics.
Human Neurobiology not only publishes invited papers; in order to facilitate interdisciplinary communication any article that fits into the scope of HN will be welcome. Please send your paper to one of the editors listed in this volume.

Copyright

Submission of a manuscript implies that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review or thesis), that it is not under consideration for publication elsewhere, that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders. All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher. The use of general descriptive names, trade names, trade marks, etc., in this publication, even if they are not specifically identified, does not mean that such names are exempt from the relevant protective laws and regulations.
While the advice and information in this journal is believed to be true and accurate at the date of going to press, neither the authors nor the editors nor the publisher can accept legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for the USA
Photocopies may be made for personal or in-house use beyond the limitations stipulated under section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US $ 0.20 per page, or a minimum of US $ 1.00 if an article contains fewer than five pages. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0721-9075, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Other regulations
Authors publishing in this journal can, under certain conditions, benefit from library and photocopy fees collected by VG WORT. Authors of German nationality and those resident in the Federal Republic of Germany or Berlin (West), as well as citizens of Austria, Switzerland and the member countries of the European Community may apply to Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestraße 49, D-8000 München 2, for detailed information.

Typeset by Schreibsatz Weihrauch, Würzburg
Printers: Konrad Triltsch, Würzburg

Number 1: Artificial intelligence and brain function (2)

M. Cohen, S. Grossberg
Neural dynamics of speech and language coding: developmental programs, perceptual grouping, and competition for short-term memory 1

C. M. Bourassa
Models for sensation and perception: a selective history 23

H. Glünder
On functional concepts for the explanation of visual pattern recognition 37

Regular contributions

F. Vogel, J. Krüger, H.-P. Höpp, E. Schalt, R. Schnobel
Visually and auditory evoked EEG potentials in carriers of four hereditary EEG variants 49

M. Schieppati, A. Nardone, M. Musazzi
Modulation of the Hoffmann reflex by rapid muscle contraction or release 59

T. Elbert
Patterns of stimulus- and self-induced slow brain potentials – a sign of task-specific preparation 67

Announcement 70

Number 2

Regular contributions

H. Braak, E. Braak
Nuclear configuration and neuronal types of the nucleus niger in the brain of the human adult 71

R. Bruyer
Lateral differences in visual processing: relative vs exclusive hemispheric specialization 83

R. L. Holloway, M. C. de Lacoste
Sexual dimorphism in the human corpus callosum: an extension and replication study 87

M. C. de Lacoste, R. L. Holloway, D. J. Woodward
Sex differences in the fetal human corpus callosum 93

R. St. John, B. Timney
Interhemispheric transmission delays in human strabismics 97

H. C. Diener, J. Dichgans, B. Guschlbauer, M. Bacher
Role of visual and static vestibular influences on dynamic posture control 105

J. Nguyen-Legros, C. Versaux-Botteri, A. Vigny
Early development of tyrosine hydroxylase-like and substance P-like immunoreactivity in the human fetal retina 115

Artificial intelligence and brain function (continued)

S. W. Zucker, R. A. Hummel
Receptive fields and the representation of visual information 121

T. Caelli, M. Hübner, I. Rentschler
On the discrimination of micropatterns and textures 129

P. C. Dodwell
Computing and understanding 137

Number 3: Neurotransmitters and the human brain (1)

Introduction

F. E. Bloom, J. H. Morrison
Neurotransmitters of the human brain 145

D. M. A. Mann, P. O. Yates
Neurotransmitter deficits in Alzheimer's disease and in other dementing disorders 147

S. N. Haber
Neurotransmitters in the human and non-human primate basal ganglia 159

D. G. Amaral, M. J. Campbell
Transmitter systems in the primate dentate gyrus 169

D. A. Lewis, M. J. Campbell, S. L. Foote, J. H. Morrison
The monoaminergic innervation of primate neocortex 181

Regular contributions

P. Mihajlovic, N. Zecevic
Development of the human dentate nucleus 189

C. Njiokiktjien, M. Driessen, L. Habraken
Development of supination-pronation movements in normal children 199

S. S. Campbell
Estimation of empty time 205

H. Strasburger, I. Rentschler, W. Scheidler
Steady-state pattern VEP uncorrelated with suprathreshold contrast perception 209

Number 4: Neurotransmitters and the human brain (2)

C. Bouras, P. J. Magistretti, J. H. Morrison
An immunohistochemical study of six biologically active peptides in the human brain 213

Y. S. Allen, S. R. Bloom, J. M. Polak
The neuropeptide Y-immunoreactive neuronal system: discovery, anatomy and involvement in neurodegenerative disease 227

Regular contributions

J. Boschert, L. Deecke
Handedness, footedness and finger and toe movement-related cerebral potentials 235

H. Deubel, W. Wolf, G. Hauske
Adaptive gain control of saccadic eye movements 245

W. Skrandies, I. Gottlob
Alterations of visual contrast sensitivity in Parkinson's disease 255

Erratum 260
